

WashCentral

Features & Capabilities

A complete, ground-up rebuild of the WashAssist platform — carrying every capability forward, adding powerful new tools, and modernizing the foundation for security, reliability, and scale.

179 Modules migrated with full parity	100% Feature parity with the prior platform	16+ Brand-new capability areas	3 Phased releases (V1 + roadmap)
---	---	--	--

Prepared by Micrologic · WashCentral Team June 2026

What's Changed, and Why It Matters

WashCentral is not an update to the previous WashAssist platform — it is a complete rebuild on a modern foundation. The goal was straightforward: keep everything you rely on today, make it faster and more secure, and open the door to a new generation of tools.

Every one of the 179 modules from the prior platform has been carried forward with full feature parity, so your team loses nothing in the transition. On top of that, WashCentral introduces more than a dozen brand-new capability areas — from a redesigned marketing suite and a live operational command center to predictive scheduling and a complete audit trail. Underneath it all, the platform has been re-engineered for security, reliability, and scale, with further architecture improvements arriving across Releases 2 and 3.

This document is organized in four parts

- 1. Complete Feature Parity** — Everything from the prior platform, carried forward across 179 modules.
- 2. What's New** — Brand-new capabilities that did not exist in WashAssist.
- 3. Security & Reliability** — Protections and performance built into the new foundation.
- 4. What's Coming Next** — The Release 2 and 3 roadmap.

Complete Feature Parity

WashCentral migrates all 179 modules from the previous platform. The table below groups them by area, with a count of screens carried forward and a summary of what each area covers. Everything your team uses today is here — rebuilt and modernized.

Functional Area	Screens	What It Covers
Customer Relationship (CRM)	15	Customers, vehicles, receipts, feedback, notifications, blacklist, license-plate recognition (ALPR), issues, referral program, and service requests — unified in one place.
Memberships, Plans & Loyalty	20	Rewards, Unlimited plans, VIP, prepaid books, gift cards, loyalty discounts, promotional upgrades, fundraisers, coupons, and bundles.
House Accounts	3	House accounts, invoice generation, and account information.
Sales, POS & Tickets	23	Ticket lookup, payments, credit-card transactions, cashier / greeter / lube tools, macros, surcharges, tax, discounts, and transaction types.
Refunds & Rewash	3	Refund approvals, refund reasons, and rewash reasons.
Employees, Labor & Scheduling	16	Employees, scheduling, time clock with Site Watch, technician commissions, payouts, bank drops, DayForce, and predictive scheduling.
Users & Security	4	Users, user levels, user groups, and security levels.
Inventory, Equipment & Maintenance	20	Inventory items, types and batches, vendors, equipment, maintenance templates, checklists, relays, terminals, and screen layouts.
Locations & Org Structure	21	Locations, location groups, companies, hours, profit centers, departments, categories, services, GL codes, and event/detail types.
Marketing & Automation	13	Campaigns, automation, segments, landing pages, bulk SMS, push notifications, offers, and deliverability.
Customer Portal	14	Settings, customizations, styling, quick links, navigation, products, locations, and email/SMS receipt templates.
Dashboards, Reporting & Gamification	12	Dashboard, Command Center, POS dashboard, operational forecasting, reports, scheduled reports, scoreboard, and prizes.
Support, Settings & System	15	Settings, features, audit log, kiosk screens, PIN codes, tasks and scheduler, templates, user guide, and home.
Total modules migrated	179	<i>Full feature parity with the previous WashAssist platform.</i>

What's New in WashCentral

Alongside everything carried forward, WashCentral adds capabilities that simply did not exist before. These are grouped below by the value they bring to your operation.

Marketing & Customer Engagement

Landing Pages (next generation)	Build branded signup and promotion pages with a drag-and-drop editor and ready-made templates, set location-specific pricing, schedule launches, and connect signup straight to payment — no developer required.
Marketing Automation (next generation)	Design customer journeys visually on a flow canvas to automate outreach and follow-ups.
Customer Segments	Group customers into targeted audiences with built-in KPIs, charts, and one-click export for campaigns.

Customer Portal & Access

Barcode & One-Time-Passcode Login	Faster, more secure customer sign-in with barcode and OTP options.
App-Style Portal & Discoverability	An installable, app-like portal experience (PWA) that is also easier for customers to find online (SEO).

Operations & Insight

Command Center & Dashboard Widgets	A live operational dashboard with configurable KPI widgets for at-a-glance performance.
Predictive & Advanced Scheduling	Forecast staffing needs, track schedule variance, and manage availability requests — well beyond a basic time clock.
Full Audit Log	A complete, searchable activity trail across customers, tickets, refunds, time clock, and locations.
Report Print & Export	Consistent on-screen, PDF, Excel, and CSV exports across reports and lists.

Reporting & Data Foundation

Modern Reporting Engine	Reports render on a new, faster, self-contained engine for improved speed and reliability.
Automated Scheduled Reporting	Cloud-native scheduled report delivery, engineered to run dependably at scale.
Re-Engineered Data Layer	A rebuilt data foundation powering the new dashboards, lists, and KPIs — for speed and consistency.

Security (built in)

Modern Authentication	Token-based sign-in designed to current security standards.
Session Protection	Login sessions are bound to the device and browser to block session hijacking and cookie-replay attacks.
Anti-Abuse Defenses	Rate limiting and decoy protections guard list screens against automated scraping and abuse.

Modernized Experience

Refreshed Interface & Design System	A full visual redesign — KPI strips, cleaner navigation, record counts, bulk selection, and one-click PDF/CSV export built into every list.
--	---

PART 3 · BUILT ON A STRONGER FOUNDATION

Security, Reliability & Performance

Many of the most important improvements happen behind the scenes. WashCentral was rebuilt with protection and performance designed in from the start, so the platform your business depends on is more secure and more dependable — without your team having to do anything differently.

Secure by design

Modern token-based authentication, sessions bound to the device and browser to stop hijacking and replay attacks, plus rate limiting and decoy defenses against automated scraping and abuse.

Reliable reporting at scale

A new self-contained reporting engine and cloud-native scheduled delivery, engineered to run dependably as your reporting needs grow.

A faster, re-engineered core

A rebuilt data layer and modernized application framework power the new dashboards, lists, and KPIs with greater speed and consistency.

Cloud-native architecture

Built on AWS, with infrastructure designed to scale alongside your operation.

What's Coming in Releases 2 & 3

WashCentral V1 is the foundation, not the finish line. The next releases evolve the platform's architecture to unlock real-time capabilities, stronger data synchronization, and even greater scalability.

Release	Capability	What It Delivers
Release 2	Marketing Module on the New Event-Driven Backbone	The first module delivered on WashCentral's new event-driven architecture — the foundation for real-time, responsive features.
Release 2	Bi-Directional Data Replication	A modern messaging-based replication layer for more reliable data synchronization across locations and the cloud.
Release 3	Event-Driven Microservices	A re-architected, domain-driven backend engineered for scalability and resilience as your operation grows.

In short: you keep everything you have, you gain a great deal more, and the platform underneath is more secure and ready to grow with you.

Questions about any capability above? Your Micrologic team is happy to walk through it with you.
