

WashCentral Migration FAQ

- 1. How do we migrate a client from WashAssist to WashCentral?**
Migration is seamless. Clients only need the new WashCentral URL, which we can provide them or automatically redirect them to when they access WashAssist.
- 2. How do we onboard a new client to WashCentral?**
The standard onboarding process performed by the Pre-Configuration team remains the same; the only change is providing the WashCentral URL.
- 3. What does Tech Support need to do to switch a client from WashAssist to WashCentral?**
 - Beta Phase: Submit a Jira ticket (CSI board) to Development for URL redirection.
 - GA Phase: A feature will be available in the Admin Portal for Tech Support to perform the switch directly.
- 4. Can a client access WashAssist after migrating to WashCentral?**
If URL redirection is implemented, the client cannot access WashAssist unless the switch is reverted.
- 5. How can we switch a client back to WashAssist?**
Submit a Jira ticket on CSI board (Tech Support team is aware of this process, and have access to this board) to Development to revert the URL redirection.
- 6. Do user credentials change during the switch?**
No.
- 7. Do we need to port users to WashCentral?**
No.
- 8. Do we need to migrate client data?**
No. WashCentral uses WashAssist data.
- 9. What is the plan for WashAssist after WashCentral rollout?**
WashAssist will enter support mode (critical fixes only) for a TBD duration before it is retired.
- 10. What happens to client data when WashAssist is retired?**
The data remains as-is and will continue to be available in WashCentral.
