

WC-01-01 — The Global Navigation Rail

v1.0 · July 8, 2026 · Author: Claude — Micrologic training project **Verified against demo.washcentral.com on July 8, 2026.**

Purpose

Learn to move anywhere in WashCentral in seconds: the 13 operational modules plus Settings on the global navigation rail, what each module contains, and how the expandable sidebar reveals each module's section menu.

Audience and prerequisites

Internal Micrologic technicians (all tracks). Prerequisites: WC-00-02 (Signing in) completed; you are signed in and on the **Command Center**. No special permission level observed for navigation.

Navigation path

Global rail (dark vertical bar, far left, present on every screen), top to bottom.

Steps

One action per step. Hold 2–3 seconds on each new screen.

1. On the **Command Center**, locate the dark rail on the far left. **Expected:** 14 icons top-to-bottom plus your avatar at the very bottom.
2. Click the **Expand sidebar** chevron near the bottom of the rail. **Expected:** the rail widens; header shows **WASHCENTRAL** with ● **Command Center** as the current page; module labels become visible.
3. Click **Analytics**. **Expected:** **Executive Dashboard** loads (“The state of the business”); the sidebar lists section groups **ANALYTICS · MARKETING · INTELLIGENCE · FORECASTING** (22 pages).
4. Click **Marketing**. **Expected:** **Campaigns** loads; sidebar items include Campaigns, Automation, SmartLinks, Customer Segments, Offers & Promotions, Email/SMS/RCS Templates, Deliverability.
5. Click **CRM**. **Expected:** **Customers** loads with the KPI strip (Total Customers · Active Members · At Risk · Prospects); sidebar shows the CRM group plus **SERVICE DESK → Agent Console**.
6. Click **Sales**. **Expected:** **Tickets** loads (header group reads TRANSACTIONS); sidebar: Tickets, Ticket Details, Payments, Payouts, Shifts, Declined Credit Card Log, Gift Card Transactions, House Account Transactions.
7. Click **Inventory**. **Expected:** **Inventory Items** loads; sidebar: Items, Batches, Adjustments, Vendors, Chemicals & Supplies, Purchase Orders.
8. Click **Team**. **Expected:** **Employees** loads; sidebar groups **TEAM · SALES COACHING · GAMIFICATION**.
9. Click **Operations**. **Expected:** **Maintenance Issues** loads; sidebar groups **MAINTENANCE · INCIDENTS · SCHEDULING**.
10. Click **Digital**. **Expected:** **Portal Members** loads; sidebar groups **PORTAL · MOBILE APP**.
11. Click **IT & Support**. **Expected:** **Support Tickets** loads; sidebar includes **ML Command Center**, Help Desk (Zoho), Knowledge Base, System Alerts, Training Requests and the **AUDIT** group.
12. Click **Billing**. **Expected:** **Usage & Billing** loads (current billing period, SMS/Email usage).
13. Click **Academy**. **Expected:** **My Dashboard** loads (WashCentral Academy — courses, paths, certificates).
14. Click **Reports**. **Expected:** the Reports hub loads (VIEWS: All Reports 173 · Favorites · Scheduled Reports · Advanced Analytics · Custom Builder; 19 categories).
15. Click the **Settings** gear at the bottom of the rail. **Expected:** Settings home loads — “System configuration, setup, and platform preferences,” counter **16 categories · 92 pages**.

16. In the Settings sidebar, click ← **Close Settings**, then click **Command Center** on the rail. **Expected:** you are back on the Command Center. End of lesson.

Expected results

You can reach any module in one click, name what lives in each, and use the expanded sidebar to read a module's section menu instead of guessing.

Notes and troubleshooting (observed behavior only)

- The rail is identical on every page; only the highlighted module changes.
- Each module page carries its own secondary sidebar with grouped section links — read it before searching.
- Faster than clicking: **Ctrl+K** opens the command palette (“Search pages, modules, actions...”) — covered in WC-01-02.
- If you learned WashAssist's 14-module map: Employees/Scheduler/Gamification are consolidated under **Team**; Maintenance under **Operations**; Mobile/Portal under **Digital**; Support/Audit under **IT & Support** (see DISCREPANCIES.md #2).

WC-01-01 — Global Navigation Rail · Snagit Shot List (operator-ready)

v1.0 · July 8, 2026 · Target output: **WC-01-01-global-navigation-v1.0.mp4** · MP4 (H.264) · 30 fps · **1920×1080 native, no scaling** · mic and system audio OFF (narration is ElevenLabs only) Step numbers match the guide and the narration blocks one-to-one. **Verified against demo.washcentral.com on July 8, 2026.**

Pre-roll checklist (not recorded)

- ☐ Display/capture region exactly 1920×1080; verify first export's pixel dimensions before recording anything else.
- ☐ Clean browser profile, maximized, 100% zoom, bookmarks bar hidden, one tab, no extension badges; OS Do Not Disturb on.
- ☐ Signed in already (credentials never on camera); start URL: demo.washcentral.com/command-center.html.
- ☐ Snagit: cursor highlight ON, click animation ON.
- ☐ Sidebar starts COLLAPSED (icons only). If expanded, click the collapse chevron before rolling.

Shots

Format: **Step — action → expected state · hold · edit notes**. “Hold” = seconds of stillness after the expected state renders. Move deliberately: cursor travel ≈1s, hover ≈1s, then click.

Step	Action (exact target)	Expected state	Hold	Edit notes
1	None — open on Command Center; slowly move cursor to the dark left rail, hover the top icon	Command Center visible; rail icons top-to-bottom	3s	Callout (1) on the rail; arrow spanning top→bottom
2	Click the Expand sidebar chevron (bottom of rail, above the Settings gear)	Rail widens; “WASHCENTRAL” header; ● Command Center highlighted; labels visible	3s	Callout (2) on the chevron; zoom-in 150% on expanded header (1.5s)
3	Click Analytics	Executive Dashboard — “The state of the business”; sidebar groups ANALYTICS / MARKETING / INTELLIGENCE / FORECASTING	3s	Callout (3); slow vertical cursor sweep down the sidebar groups (2s), no scroll
4	Click Marketing	Campaigns list + KPI strip	2.5s	Callout (4)
5	Click CRM	Customers + KPI strip (Total Customers · Active Members · At Risk · Prospects)	3s	Callout (5); zoom-in on SERVICE DESK → Agent Console sidebar entry (1.5s)
6	Click Sales	Tickets (header group TRANSACTIONS)	2.5s	Callout (6)
7	Click Inventory	Inventory Items	2.5s	Callout (7)
8	Click Team	Employees ; sidebar TEAM / SALES COACHING / GAMIFICATION	3s	Callout (8); cursor sweep over the three group headers
9	Click Operations	Maintenance Issues ; sidebar MAINTENANCE / INCIDENTS / SCHEDULING	3s	Callout (9)
10	Click Digital	Portal Members ; sidebar PORTAL / MOBILE APP	2.5s	Callout (10)

Step	Action (exact target)	Expected state	Hold	Edit notes
11	Click IT & Support	Support Tickets ; sidebar shows ML Command Center ... AUDIT group	3s	Callout (11); zoom-in on ML Command Center entry (1.5s)
12	Click Billing	Usage & Billing — current billing period banner	2.5s	Callout (12)
13	Click Academy	My Dashboard — WashCentral Academy	2.5s	Callout (13)
14	Click Reports	Reports hub — VIEWS + categories sidebar	2.5s	Callout (14)
15	Click the Settings gear (bottom of rail)	Settings home — “16 categories · 92 pages”	3s	Callout (15); zoom-in on the counter (1.5s)
16	Click ← Close Settings , then Command Center	Back on Command Center	3s	Callout (16); fade out

Estimated runtime: ~3:40 including cursor travel. If any unexpected dialog, error, or changed data appears: stop, note it, resolve or park, re-record the segment — do not improvise.

If Claude drives while you record

I can execute steps 1-16 live in the browser with the timings above on request; you run Snagit (or any 1920×1080 MP4 screen recorder) on the window. Say “drive lesson 01-01” when you’re rolling.

Verified against demo.washcentral.com on July 8, 2026. v1.0 · Steps match the guide and shot list one-to-one.

Settings header

- **Voice:** WashCentral (ElevenLabs voice ID IL9omLju7bjBLRrsVtD) — project voice for all lessons
- **Model:** eleven_v3 (player default at production time — re-confirm in the ElevenLabs dashboard before batch production)
- **Output:** 44.1 kHz MP3 · file name WC-01-01-global-navigation-narration-v1.0.mp3
- **Pace target:** 140-150 wpm, sized to each shot’s hold time
- **Pronunciation guide:** WashCentral → “Wash Central” · ALPR → “A-L-P-R” · POS → “P-O-S” · demo.washcentral.com → “demo dot wash central dot com” · CRM → “C-R-M” · ⌘K/Ctrl+K → “control K”

Timed script

[00:00 | Step 1 — Command Center, cursor to rail] Welcome to WashCentral. This is the global navigation rail — the dark bar on the far left. It is on every screen, and it is how you move between the platform's thirteen modules and Settings.

[00:20 | Step 2 — Expand sidebar] Near the bottom, click the expand chevron. The rail widens, and every icon gets a label. Command Center is highlighted — that's where you are.

[00:35 | Step 3 — Analytics] Click Analytics. The Executive Dashboard loads. Notice the sidebar: this module groups twenty-two pages under Analytics, Marketing, Intelligence, and Forecasting. Every module works this way — the sidebar is its table of contents.

[00:53 | Step 4 — Marketing] Click Marketing. Campaigns, automation, templates, segments, and deliverability all live here.

[01:05 | Step 5 — CRM] Click CRM. This is the member database — customers, gift cards, house accounts, vehicles. At the bottom, the Service Desk group holds the Agent Console.

[01:21 | Step 6 — Sales] Click Sales. Tickets and transactions: payments, payouts, shifts, and the declined credit card log.

[01:34 | Step 7 — Inventory] Click Inventory. Items, batches, adjustments, vendors, and purchase orders.

[01:45 | Step 8 — Team] Click Team. One module for your people: employees, schedules, and time clock — plus sales coaching and gamification.

[02:00 | Step 9 — Operations] Click Operations. Maintenance work orders, incident reports, and customer appointment scheduling.

[02:14 | Step 10 — Digital] Click Digital. The customer-facing surfaces: the self-service portal and the mobile app.

[02:26 | Step 11 — IT & Support] Click IT and Support. Support tickets, the help desk, system alerts, and the knowledge base — plus the M-L Command Center and the audit trail. For support technicians, this is home.

[02:42 | Step 12 — Billing] Click Billing. Usage and billing — what the platform charges for S-M-S and email, by campaign.

[02:54 | Step 13 — Academy] Click Academy. Built-in training: courses, learning paths, and certificates.

[03:05 | Step 14 — Reports] Click Reports. One hub, one hundred seventy-three reports, organized by view and by category.

[03:16 | Step 15 — Settings] Click the gear at the very bottom. System configuration — sixteen categories, ninety-two pages. We cover it in its own phase.

[03:30 | Step 16 — Close] Click Close Settings, then Command Center. You're back where you started — and you now know where everything lives.

READY FOR GENERATION — settings confirmed July 8, 2026 (voice: WashCentral).
